What is Covid-19?

What are the symptoms?

How can you stay safe?

Can a vaccine protect me?

If you are ready?

How will Covid-19 affect your support?

What is a rapid antigen test?

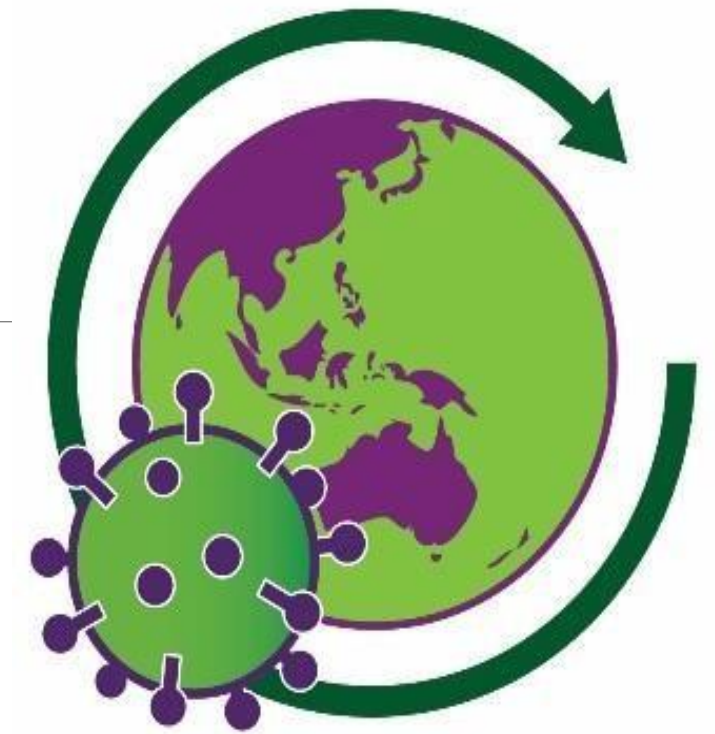

How can we support you?

What else?

What should you do?

What is COVID -19?

Corona Virus or Covid-19 is a virus. (like a bad cold). This has affected a lot of people around the world and made them very sick. This virus is spreading very quickly and easily from one person to another. COVID-19 is a pandemic. A pandemic is when a virus spreads very quickly in lots of countries around the world.

CORONAVIRUS (COVID-19)

FEVER

COUGH

SHORTNESS OF BREATH

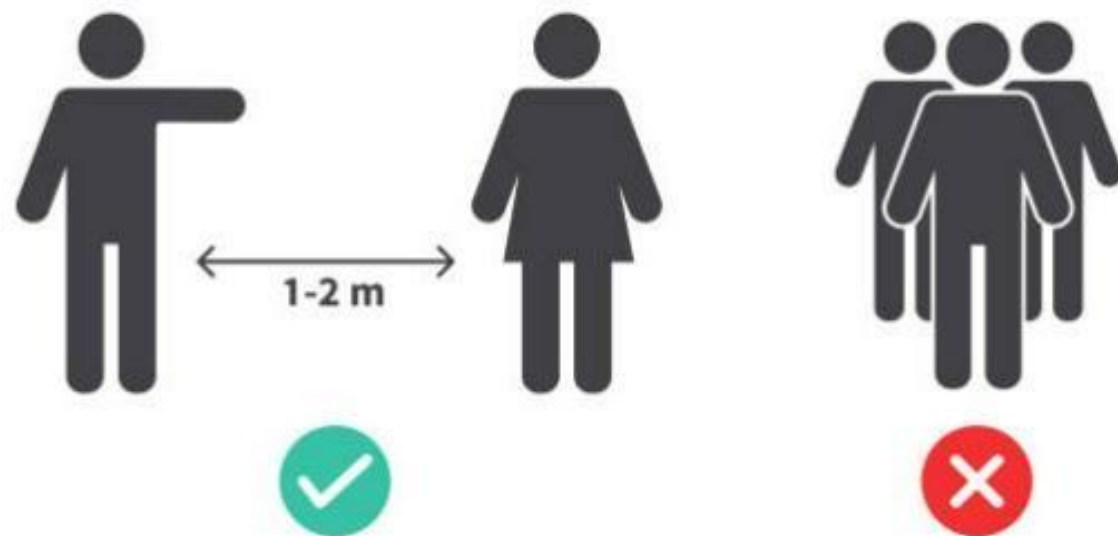

SORE THROAT

What are the symptoms? – A fever – feeling hot – a cough – that won't stop – not getting your breath – maybe pain in the chest and a sore throat....(not very nice)

How can you stay safe?

SOCIAL DISTANCING

SOCIAL DISTANCING - This means staying away from big crowds and getting too close to people.

Wash your hands with soap frequently and sanitize your hands

How can you stay safe?

Try not to touch your face

Cover your sneeze and cough with your elbow rather than your hand

How can you stay safe?

Call your GP (DOCTOR) if
you are unwell

Ask about the Covid
vaccine

Can a vaccine protect me?

Getting a COVID-19 vaccine

Protects you from getting very sick or even dying from COVID-19.

It may also help protect people around you by slowing the spread of the virus.

It protects not just you it can protect your family, and other people in your community.

If you are ready?

Take time to think.

If you are ready to have a vaccine (a little quick needle), let us know “YES”

We are here for you. We can guide you and assist you with your vaccination if this is your choice.

How will COVID-19 affect my supports?

How will COVID-19 affect my support?

Covid-19 affects many people around the world.

Changes that may occur:

1. You may get a different support worker.
2. You may be asked to provide your vaccination status and proof before you go to certain places like the movies or a café or even to come to respite.
3. Some of your favorite activity places may even be closed.
4. Your support worker will check your temperature to keep you safe.
5. We may ask you to have a mouth test to catch your mouth moisture to check for infections. This is called an RAS test. Just to be safe.

What is the RAS Test? (Rapid Antigen Test)

This is a simple saliva test. (mouth fluid)

Your support worker will undertake this test.

Will only take a quick 15 minutes.

The support worker will do this while you are in the car (STA) or when they come to your house (IHC)

REMEMBER THIS FOR YOURS, OURS, AND EVERYONE'S SAFETY.

Let's watch a video – how to use this test?

<https://www.youtube.com/watch?v=g9dFYd0C8I8&t=6s>

What else?

Support workers will ask you to:

1. Wash your hands frequently
2. Use hand sanitizer
3. Remember to maintain social distancing

What should you do?

Your safety is our priority.
We appreciate your help to
keep you and others safe.

We're in this together.

**Stopping the spread
starts with you!**

Let us know if you are
unwell.

Inform us if you have been
asked to self-isolate

Let us know what support
you need the most?

We at
'Wonderland
Community
Services' will work
to reduce your risk
of catching
coronavirus when
you receive
supports.

We at 'Wonderland
Community
Services will do
our best to keep
YOU and
EVERYONE in the
community safe.

Thank you!
